Eurol Transfluid ATF-CVT

Transmission oil for both automatic and continuously variable transmissions

Article number E113668 Version 1.5 18/09/2026

Product information

Eurol Transfluid ATF-CVT is a fully synthetic multifunctional oil suitable for both automatic transmissions and continuously variable transmissions for vehicles produced in North and South America, Europe, and Asia.

Eurol Transfluid ATF-CVT ensures that automatic and continuously variable transmissions continue to shift smoothly under heavy conditions, as the product prevents unnecessary friction. The low pour point and high VI ensure that Eurol Transfluid ATF-CVT can be used over a wide temperature range.

The combination of high-quality base oils with a state-of-the-art additive that can be used for both ATF and CVT applications results in a very extensive list of applications in which Eurol Transfluid ATF-CVT can be used.

Eurol Transfluid ATF-CVT retains its excellent properties and easily meets the prescribed replacement intervals due to its very good oxidation and thermal stability.

Because Eurol Transfluid ATF-CVT is suitable for both automatic and continuously variable transmissions, it has a very broad applicability and an extensive 'suitable for use' list with specifications for which it can be used.
