

Eurol Syntan EP ISO-VG 220

Synthetic industrial gear oil based on polyalkyleneglycol

Description

Eurol Syntan EP ISO-VG 220 is a fully synthetic oil based on polyalkylene glycols for the lubrication of all types of heavily loaded gearing, like hypoid and worm gears.

Eurol Syntan EP ISO-VG 220 has excellent anti-oxidation, anti-wear, anti-rust and high pressure properties. It has minor tendency for building foam and has a naturally high viscosity index.

Eurol Syntan EP ISO-VG 220 is durable and extends the life of the machinery. It allows extended change intervals and therefore reduces the costs of maintenance.

Eurol Syntan EP ISO-VG 220 cannot be mixed with mineral oils. It is advisable to rinse the system prior to changing to Eurol Syntan EP ISO-VG 220. Eurol Syntan EP ISO-VG 220 can only be mixed with similar synthetic products formulated with poly-alkylene glycols.

Eurol Syntan EP ISO-VG 220 may not be brought into contact with aluminum (alloy) gears and axles. Aluminum housing can be exposed to Eurol Syntan EP ISO-VG 220.

Paints and coatings can be attacked by this product. We recommend 2component coating for inner system coating. Seals can also be attacked. Up to 100°C, NBR-rubber is recommended, FKM-rubber is recommended above this temperature.
