

## Eurol SSP 22

### Chlorine-free cutting oil for use in atomizing equipment

Article number E120600 Version 1.0 15/04/2025

#### Product information

Eurol SSP 22 is a cutting fluid based on a synthetic polyol ester (derived from natural fats), with added sulfur and phosphorus-containing additives. Not miscible with water. The product contains no mineral oil, is chlorine-free, and is biodegradable.

Eurol SSP 22 is used undiluted for the machining of all types of metals, except non-ferrous metals. Burr formation during cutting is prevented with this product. It is therefore extremely suitable for aluminum machining.

Eurol SSP 22 is also suitable for non-cutting operations. Application can be done by spraying/misting, as well as by circulation/pumping. Due to its viscosity, it is also possible to apply the product with a brush.

Eurol SSP 22 has a shelf life of at least 12 months when stored between 5°C and 45°C. WGK class 1, not harmful under normal use.

#### Physical properties

Characteristic	Value/Result	ASTM Standard
Color	brown	
Density at 20°C	0.93 kg/l	ASTM D 4052
Flash Point	300 °C	ASTM D 92
