Eurol UBC Black

Mist spray equipment, black, corrosion-resistant

Article number E201120 Version 1.0 15/04/2025

Product information

Eurol UBC Black is a durable and fast-drying anti-corrosion coating based on bitumen. The coating provides long-lasting protection to the undersides of cars, trailers, caravans, storage tanks, boats, and on repaired parts.

Eurol UBC Black is sound-dampening and highly resistant to rust and the oxidizing effects of chemicals.

Eurol UBC Black is applied with a suction gun or a barrel suction gun. Apply no thicker than 1 to 3 mm and spray in a well-ventilated area. Depending on the application, this product can be thinned with solvent.

The surfaces to be treated must be clean, dry, and free of rust, dust, and grease. Treat the substrates with Eurol UBC Black until the desired layer thickness is achieved. If thicker layers are desired, it is recommended to allow the product to dry between layers. Any contamination, such as the used equipment, can be easily cleaned with solvent in the "fresh" state. Shake small packaging before use.

Physical properties

Characteristic	Value/Result	ASTM Standard
Color	Black	
Flash Point	36 °C	ASTM D 92
