Eurol Degreaser HF Plus

Degreaser with a high flash point

Article number E302110 Version 1.1 12/08/2026

Product information

Eurol Ontvetter HF Plus is composed of highly effective emulsifiers and hydrocarbon solvents with low evaporation loss.

Eurol Ontvetter HF Plus is used for the quick deconservation of new cars, cleaning engine parts, filters, machines, engine rooms, tanks, lifts, etc. It can also be used for cleaning greasy floors and walls; after rinsing with water, no greasy layer remains.

Eurol Ontvetter HF Plus should be used undiluted, has a pleasant scent, and is economical in use. The cleaned parts can be rinsed with water. Plastics and rubbers are not affected during the short contact time. Furthermore, it is suitable for all surfaces as it is pH neutral.

Eurol Ontvetter HF Plus has a relatively low evaporation rate and is biodegradable.

The flash point is higher than 61 degrees, so Eurol Ontvetter HF Plus is not ADR-classified, which also offers advantages regarding the PGS-15 successor to the CRP 15 guideline for the storage of hazardous goods: PGS-15 only prescribes enhanced storage requirements if the product were ADR-classified.

Physical properties

Characteristic	Value/Result	ASTM Standard
Color	red	
Density at 20°C	0.80 kg/l	ASTM D 4052
Flash point	64 °C	ASTM D 92
