Eurol Antifreeze BS 6580

Meets BS 6580 standard, suitable for open and closed cooling systems

Article number E503150 Version 1.0 16/04/2025

Product information

Eurol Antifreeze is recommended for use in all cooling systems of combustion engines (both LPG, gasoline, and diesel) and other heat transfer systems such as central heating systems. It is a homogeneous stable product based on mono-ethylene glycol. It is formulated according to the specifications of European automobile manufacturers.

Eurol Antifreeze contains additives that provide protection against corrosion and foam formation. Due to the high reserve alkalinity, the cooling system is protected against rust for a very long time.

Eurol Antifreeze offers the best corrosion protection when applied in concentrations of 25 to 50 volume % in water. Concentrations higher than 65% are not recommended, especially because frost protection then decreases.

Eurol Antifreeze is completely safe for rubbers, plastics, metals, and aluminum or its alloys. It is nitrite-, amine-, and phosphate-free.

Frost Protection Table

Antifreeze (% in water) Frost Protection (°C)

25%	-11°C
30%	-16°C
33%	-18°C
40%	-26°C
50%	-37°C

Performance level

- ASTM D3306
- BS 6580

Physical properties

Characteristic	Value/Result	ASTM Standard
Color	Blue	
Density at 20°C	1.11 kg/l	ASTM D 4052
Flash Point	111 °C	ASTM D 92
