Eurol Lube PL-S Spray 400ML

The multifunctional “dry” lubricant

Description

Eurol Lube PL-S spray is a versatile dry lubricant, specially developed for clean and long-lasting lubrication, ideal where excellent penetrating action and anti-corrosion properties are required. This product performs optimally in demanding environments such as exposure to moisture and dirt. Thanks to its "dry" lubricating properties, dirt does not adhere to treated surfaces, ensuring long-lasting protection.

Applications of Eurol Lube PL-S Spray:

- Open lubrication points such as couplings, lightly loaded open gears and bearings
- Locks and hinges
- Transport and drive chains in logistics and production environments
- Chains of two-wheelers and forklifts
- Steel cables and conveyor belts
- Open lubrication points in metalworking machines

Eurol Lube PL-S spray is an excellent replacement for conventional lubricants. Unlike PTFE sprays, this lubricant contains no microplastics, making it more environmentally and user-friendly.

Physical properties

Colour	Beige,brown
Flash point	60 °C
Base oil type	Synthetic
Operating temperature	-20 – 120 °C
