## Eurol ATF Treat Plus

Oil additive for smooth operation of the automatic transmission

### Description

Eurol ATF Treat Plus is an additive developed to increase the automatic transmission fluid performance. This product has an increasing performance effect on automatic transmissions which are starting to shift rougher.

Eurol ATF Treat Plus ensures a lubricating film on all moving parts, which results in less friction of metal on metal such that it offers long term protection.

Eurol ATF Treat Plus can be used in an automatic transmission which has slipping problems under cold conditions. If the problem is resolved after the transmission has warmed up, Eurol ATF Treat Plus will eliminate this transmission problem.

Eurol ATF Treat Plus is designed to extend the life of the automatic transmission. Eurol ATF Treat Plus uses the transmission oil as a carrier fluid to get to every part of the transmission. A 500ml bottle of Eurol ATF Treat Plus is recommended to use in 8L to 12L of transmission oil. Do not overfill the transmission when adding Eurol ATF Treat Plus and follow the filling guidelines of the equipment manufacturer.

Eurol ATF Treat Plus is compatible with all commercially available automatic transmission fluids, but cannot be used in CVT or DCT applications.

Users should consult the safety data sheet of Eurol ATF Treat Plus for information about storage and shelf life.

### Physical properties

Colour	light yellow	
Density at 20°C	0.866 kg/l	ASTM D 4052
Viscosity, kinematic at 40°C	104.6 cSt	ASTM D 445
Viscosity, kinematic at 100°C	18.4 cSt	ASTM D 445
Viscosity Index	196	ASTM D 2270
Flash point	233 °C	ASTM D 93
Pour point	-39 °C	ASTM D 97
