## Eurol Petrol Octane Improver

Fuel additive to increase the octane number of petrol

### Description

Eurol Petrol Octane Improver has been specially formulated to increase the research octane number (RON) of petrol. At the recommended dosage, Eurol Petrol Octane Improver will raise the RON by 4 to 6 points.

When using Eurol Petrol Octane Improver, the engine will respond quicker to changes in throttle position. The engine will feel more lively and, at constant speeds, the fuel economy will increase slightly.

Eurol Petrol Octane Improver prevents and eliminates pinging when the engine is operating in the high end of the RPM range. By adding Eurol Petrol Octane Improver, the high speed knocking resistance of the petrol is improved significantly.

Eurol Petrol Octane Improver can be safely used with any car equipped with a catalytic converter. Eurol Petrol Octane Improver can be used to boost the octane number of the fuel when the RON is insufficient for the engine to operate smoothly.

The 250 ml bottle of Eurol Petrol Octane Improver is recommended for use in 35 to 65L of fuel. Add Eurol Petrol Octane Improver to the petrol tank before refueling to ensure proper mixing.

Users should consult the Material Safety Data Sheet of Eurol Petrol Octane Improver for information about storage and shelf life. Please ask Eurol Research & Development if any further information is required.

### Physical properties

Colour	Yellow	
Density at 20°C	0.835 kg/l	ASTM D 4052
Viscosity, kinematic at 40°C	1.5 cSt	ASTM D 445
Flash point	61 °C	ASTM D 93
