Eurol Air-Filter Fluid

Foam filter oil

Article number E803950 Version 1.0 16/04/2025

Product information

Eurol Filter Oil is formulated from high-quality base oils and carefully selected solvents and additives. This makes this filter oil suitable for all brands of foam filters, without obstructing the air supply.

Eurol Filter Oil is successfully used in foam filters of cross and touring motorcycles, off-the-road vehicles, karts, and cross cars. The product retains its high-quality properties for a very long time.

Eurol Filter Oil prevents the oil from settling in the filter. It also provides absolute resistance to water, dust, sand, and dirt while allowing air to pass through to the carburetor unhindered. The blue color makes it easy to assess whether the filter oil is evenly distributed over the filter. After application, it is advisable to let the soaked filter dry in the open air.

Eurol Filter Oil is water-resistant, meaning it is not washed away by rain or spray water during washing. Eurol Filter Oil can be removed from the filter with Eurol Filter Cleaner.

Physical properties

Characteristic	Value/Result	ASTM Standard
Color	light brown	
Flash Point	-36 °C	ASTM D 92
