Eurol Ceramic Grease

Universal assembly paste

Article number E901123 Version 1.0 16/04/2025

Product information

Eurol Ceramic Anti-Seize Paste is specially formulated from high molecular oil, ceramic materials, inorganic binder, and additives.

Eurol Ceramic Anti-Seize Paste is a universally applicable assembly paste with excellent lubrication properties and outstanding protection against galling. It offers long-lasting protection against corrosion and harmful chemical influences from the outside, and is not washed away by water, thanks to its excellent adhesion.

Eurol Ceramic Anti-Seize Paste is used as an assembly paste for all parts and threads that are normally treated with metal-containing pastes, such as bearings, chains, fitting edges, splines, brake parts, and pneumatic tools in garages, shipbuilding, agriculture, and industry.

Eurol Ceramic Anti-Seize Paste is applied thinly on a preferably clean and dry surface. Mixing with regular greases should be avoided.

Physical properties

Characteristic	Value/Result	ASTM Standard
Color	white;Yellow	
Density at 20°C	1.10 kg/l	ASTM D 4052
Base oil type	Mineral	
Thickener type	Bentone	
NLGI consistency	2
