

## Refill Aerosol Air Dock

Air filling station for Refill Aerosol

### Description

Refill Aerosol Air Dock from Eurol is an automatic filling system for refill aerosol sprayer S001052. With this filling dock, a refillable sprayer filled with product can be pressurized with compressed air. The station can be connected to a compressor with a quick connect fitting. Refill Aerosol Air Dock is easy to use and provides an environmentally friendly alternative to traditional propellants and disposable packaging.

Refill Aerosol Air Dock works with a pressure between 6 and 8 bar and may not be used with a pressure above 10 bar. The amount of Eurol product is a maximum of 400mL. Acidic and basic products and products with a viscosity higher than ISO-VG 32 are not suitable for addition in refillable compressed air aerosol cans. Only use products recommended by Eurol.

### Instructions for use

Suitable for:

- S001101 – Eurol Chain Lube S-AC 38 FD
- S001121 – Eurol Chain Oil S-TP 22 FD
- S003200 – Eurol CL-F Lube
