Eurol Additive-S

Highly concentrated Syngis additive

Article number S008300 Version 1.0 16/01/2025

Product information

Eurol Additive-S is a mix of specially selected Eurol Syngis additives and is developed for lubrication applications that are so extremely heavily loaded that lubrication with a conventional lubricant is virtually impossible. It contains no harmful components such as chlorine and effortlessly replaces chlorinated paraffin. Eurol Additive-S can be added to an existing lubricant such as hydraulic oil, gearbox oil, and even metalworking oil, and dramatically enhances the EP properties. By reducing the coefficient of friction, energy is saved.

Eurol Additive-S is particularly suitable as an oil additive for:

- Extremely heavily loaded gearboxes
- Hydraulic systems
- Open lubrication points such as couplings, open gears, bearings, and hinges
- Very heavily loaded threaded connections
- As drilling oil for very heavy operations (ferrous)

Usage instructions

Shake well before use

Replace heavily contaminated oil and/or oil filters first

Add between 1% and 5% additive to the new oil

Contact us for targeted advice

Product benefits

- Provides unparalleled extreme pressure properties
- Environmentally friendly and safe to use
- Reduces vibrations and noise
- Very low friction coefficient
- Reduces energy consumption
- Extends service intervals
- Contains no chlorinated paraffins or phosphorus compounds
- Virtually odorless
- Economical in use

Physical properties

Characteristic	Value/Result	ASTM Standard
Color	brown	
Density at 20°C	0.91 kg/l	ASTM D 4052
Viscosity, kinematic at 40°C	21.9 cSt	ASTM D 445
Viscosity, kinematic at 100°C	5.5 cSt	ASTM D 445
Viscosity Index	207	ASTM D 2270
Flash Point	60 °C	ASTM D 92
Pour point	-36 °C	ASTM D 97
