Eurol Additive-S Diesel

Diesel fuel additive for maintaining the entire fuel system

Article number S008320 Version 1.1 16/04/2025

Produktinformationen

Eurol Additive-S Diesel is a blend of specially selected Eurol Syngis additives. It is developed as a diesel fuel additive for the maintenance of the entire fuel system and works preventively against corrosion and condensation in the fuel tank and lines. This product also replaces an injector cleaner, which is often used together with a system cleaner. Use is recommended to remedy and prevent diesel engine contamination. Eurol Additive-S Diesel ensures a smoother running and clean diesel engine, better start, reduced emissions, lower fuel consumption, and more engine power. It contains no chlorine.

Product benefits

- For heavily loaded diesel engines in, among others, earthmoving equipment, ships, and generators
- More environmentally friendly and safe to use
- Reduces vibrations and noise
- Highly recommended for use with HVO
- Protects against wear
- Reduces fuel consumption
- Increases engine power
- Contains no chlorinated paraffins
- Economical in use

Instructions for use

- Replace heavily contaminated fuel filters first.
- A 1000ml can of Eurol Additive-S Diesel is suitable for 1000 liters of diesel fuel.
- Add to the fuel tank before refueling to ensure a homogeneous mixture of additive and fuel.
- Allow the additive to circulate through the fuel system to ensure proper operation.
- Repeat every 2 to 3 refuels.

Physical properties

Characteristic	Value/Result	ASTM Standard
Color	dark yellow	
Density at 20°C	0.95 kg/l	ASTM D 4052
Flash point	74 °C	ASTM D 92
Pour point	-39 °C	ASTM D 97
