

Eurol Wax Lube-S Spray

Slippery and dry wax lubricant for dry lubrication and protection

Description

Eurol Wax Lube-S Spray has especially been designed for the dry waxing of surfaces. The product contains Eurol Syngis Technology giving it unique lubrication properties and anti-corrosion protection. Since a dry waxy layer is very smooth and slippery it is perfect as sliding lubricant on conveyor for the clean and dry transportation of bottles, boxes and other empty or filled packaging in the food and beverage industry. Also very useful as protective anti-corrosion layer in other industrial applications.

Instructions for use

Shake the aerosol before use
When spraying allow a distance to the treated surface of minimum 20cm
Allow the waxy layer to dry
Before treatment parts should be cleaned first with an appropriate cleaner

Eurol Wax Lube-S Spray has the following characteristics

- No hazardous ingredients
- No irritant smell
- No silicones, or micro plastics like PTFE
- Very durable slippery layer
- Lubricates and protects against corrosion
- No stains on packaging
- Repels water and pollutants
- Not aggressive towards steel surfaces, plastics or rubbers
